Milpitas, CA 95035 USA

Dear Assaji,

This letter is to inform you that Panduit has approved the JDSU Certifier40G Cable Certifier to be used in testing Panduit's copper connectivity solutions for both Channel and Permanent Link tests for Cat5e, Cat6, and Cat6a internal performance with the following requirements:

Firmware Version 3.91 or later

Testing in our lab has found that the JDSU Certifier40G showed good correlation to a network analyzer on all Cat6a internal performance tests. This is necessary to verify the performance of Panduit's Copper Connectivity Products in field installations.

PANDUIT also accepts the test results provided with this tester for all of Panduit's warranty programs.

Sincerely,

Michael Tome
Product Development Engineer
