

California Proposition 65 Position Statement

California Proposition 65, officially known as the Safe Drinking Water and Toxic Enforcement Act of 1986, was enacted in November 1986. The proposition aims to protect individuals in the state of California and the state's drinking water and environment from excessive exposure to chemicals known to the state to cause cancer, birth defects or other reproductive harm. The state maintains a list of such chemicals.

Businesses are required to provide a clear and reasonable warning before knowingly and intentionally exposing individuals in the state of California to a listed chemical. A warning is not required if the anticipated exposure level will not pose a significant risk of cancer or is significantly below levels observed to cause birth defects or other reproductive harm.

VIAVI products contain chemicals such as lead and lead compounds that are listed by the state of California as causing cancer, birth defects or other reproductive harm. However, VIAVI products are intended for use in occupational settings only and are not for consumer sale or use. Therefore, exposure to the hazardous chemicals in VIAVI products is considered "occupational exposure". Commercial customers who purchase products for use in occupational settings in the state of California, please refer to www.P65Warnings.ca.gov for more information on the warning requirements.

Notice:

The information provided in this statement is intended for informational purposes only and is not intended to be a representation or warranty of any kind, nor is it intended to modify in any way the terms and conditions of any agreement between your company and VIAVI, or the rights of either party arising therefrom.
