

CX200 SiteXpert

The CX200 SiteXpert is an advanced communications service monitor for modern technicians, offering a user-friendly interface and a comprehensive feature set to meet a wide range of infrastructure and subscriber maintenance needs.

The CX200 incorporates the most popular features from our industry-leading test sets into a field portable package without sacrificing specs or performance.

Standard Features

The list below of features come standard on every CX200.

- Tracking Generator
- Cable and Antenna Analyzer (1-Port)
- WiFi

- VNC
- Spectrum Analyzer
- Smart Access Anywhere

- StrataSync
- Remote Command Interface
- Bluetooth

Optional Features

The below features are options available on the CX200.

- 3 GHz frequency range
- P25
- DMR
- DMR Repeater

- NXDN
- P25 Phase 2
- Auto-Test Applications
- Bird 5017D Power

A Complete Test Suite

The global land mobile radio (LMR) market is rapidly transitioning from analog to digital. The CX200 is designed with advanced frequency, power, and modulation analysis instruments for both analog and digital systems.

The CX200 Instruments and Technologies Currently Available

- AM/FM/PM/SSB
- OneViewer Post Analysis Software
- P25 Phase 1
- DMR
- P25 Phase 2
- DMR Repeater
- ISM
- Tracking Generator
- NXDN
- Vector Network Analyzer

CX200 Instruments and Technologies Coming Soon

- Interference Hunting
- LTE and 5G BS OTA
- Coverage Mapping

Innovative User Interface

Continuing the innovative user interface established with the CX300, the revolutionary QuickSwitch™ feature streamlines testing by enabling rapid switching between Duplex, Transmit, and Receiver Tests without disrupting current measurement setups. QuickSwitch also allows switching between analog, P25, DMR, AutoTest, Spectrum Analyzer, and Cable and Antenna Analysis.

Multi-Tab User Interface with QuickSwitch

P25 Test Features (Optional)

The CX200 offers a comprehensive suite of P25 test features, including Linear Simulcast Modulation. Its large display provides access to essential modulation analysis tools such as the distribution plot, eye diagram, constellation plot, and trajectory plot. Users can view multiple plots simultaneously or expand a specific plot to full screen for detailed analysis. All measurements are presented in a clear, easy-to-read format.

P25 Diagrams and Plots

DMR Test Features (Optional)

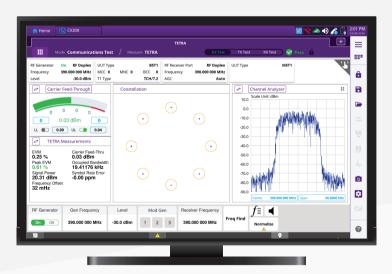

When equipped with the DMR Option, the CX200 enables comprehensive testing of DMR infrastructure and subscriber units. Its large display provides access to essential modulation analysis tools, including the distribution plot, eye diagram, constellation plot, and burst profile plot. All DMR measurements are presented in a clear, easy-to-read format for efficient analysis.

DMR Test Screens

TETRA Test Features (Optional)

The CX200, when equipped with the TETRA Option, allows you to test a wide range of TETRA radios, mobile and base stations. TETRA measurements are displayed in an easy to ready format.

TETRA Test Screens

Cable and Antenna Analysis

The CX200, standard, Cable and Antenna Analysis feature enables testing of Distance to Fault, VSWR, and Return Loss using its built-in 1-port Vector Network Analyzer. For precise, calibrated measurements, this option requires the Short-Open-Load Calibrator.

Auto-Test (Optional)

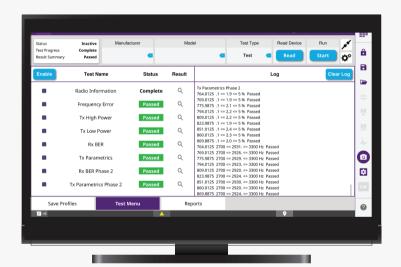

The CX200 provides fully automated radio testing and alignment for today's land mobile radios. With precise instrumentation and automation, it optimizes radio performance in minutes with minimal user input.

Supporting a wide range of automated test and alignment options, the device allows users to customize test sequences and parameters to meet specific requirements. Once configured, it enables real-time monitoring of both test progress and results.

Test data is automatically stored and can be exported via USB to an external PC for documentation and printing. Your test data can also be uploaded to VIAVI StrataSync or transferred to a PC or portable device utilizing the Smart Access Anywhere app.

VIP Tool (Optional)

The VIP Tool removes unnecessary complexities with traditional instrument programming by leveraging the power of Microsoft Excel. It is scalable, allowing you to create scripts that are as simple or as intricate as you desire. This tool allows you to easily create and export easy-to-read reports with supporting graphics, like Channel Analyzer and Distribution Plots. Work smarter, not harder with the VIP Tool.

STRATASYNC

StrataSync is a hosted, cloud-based software application that provides asset configuration and test-data management from anywhere in the world. The wireless technology in the CX200 lightens your workload by synchronizing your test results to the cloud and keeping your test set updated with the latest software. Easily save and access test results for both manual and automated tests.

SMART ACCESS ANYWHERE

The VIAVI Smart Access Anywhere application is a handy tool for remotely controlling the CX200. The SAA App enables remote operation from your PC or portable device, which allows you to operate the unit and transfer files from a remote location.
